PROFILE

Enthusiastic and motivated fresher with a strong foundation in web development, backend technologies, and database management. Passionate about building scalable applications and contributing to innovative projects. Seeking an entry-level software development role to leverage my technical skills.

PROJECTS

Crypto Trading Game Simulator
- Developed a web-based cryptocurrency trading simulator using React, Vite, and Tailwind CSS.
- Implemented virtual cash trading, profit and loss tracking, and a leaderboard.
- Designed and developed the frontend while for backend integration with MongoDB and Express.js.

Blood Donation Management System
- Developed a web application using HTML,CSS and JS for my first hackathon.
- View your donation history and track your impact
- Receive notifications and reminders for blood donation requests and appointments.
- Request blood donations from registered donors or blood banks.

Quantum Computing Blog (techforme.in)
- Designing a personalized blog website using Next.js, Tailwind CSS, and MongoDB.
- Working on API automation using n8n for publishing blog posts on Hashnode headless CMS.
